

REPTILE & MINIBEASTS HANDLING EVENTS IN SCHOOLS: FOR STUDENTS & TEACHERS

MEET THE BEASTS is all about up-close, hands-on experience with exotic beasts from around the World.

Every day we need to learn and understand new information; face challenges; develop new skills; tackle new situations; overcome our fears.

MEET THE BEASTS is an excellent addition to science lessons; learn how these animals adapt to their habitats, catch their food and avoid being eaten. **MEET THE BEASTS** is also brilliant for building confidence and self-esteem by tackling and overcoming fears ... and it's great as a treat or reward! Each session is designed around your specific needs.

"The students were left 'buzzing' and thoroughly enjoyed your sessions. Your enthusiasm and patience made the sessions even more enjoyable. Your range of reptiles made it very different to other sessions that are available and we appreciated the extras you did. We look forward to working with you again in the near future."

Science Teacher, Rushey Mead School, Leicester
